

Universal Network Solutions Inc.

Job Title: Senior Network Security Engineer

Summary:

The Senior Network Security Engineer is responsible for post-sales product and service implementation. Consultants are responsible for completing scheduled/assigned projects per the pre-defined scope of work (SOW) and for following all UNS policies and procedures.

Core Skills Required (5 Roles and Responsibilities):

- Post-sales product and service implementation
- Ensure customer communication and satisfaction to be sure project has met all objectives and is completed within agreed upon hours
- Complete administrative project tasks: time and expense entry, status reporting, and project completion reporting
- Obtain and maintain product certification(s)

Responsibilities:

- Install, test, evaluate, implement equipment and software per project scope
- Provide product training to clients
- Provide excellent customer service and communication to all parties
- Escalate out of scope issues or client issues immediately to Project Manager and UNS management
- Maintain quality service by establishing and enforcing organization standards
- Maintain professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing personal networks
- Obtain and maintain product certification in at least one (1) product
- Complete administrative project tasks like time and expense entry, status reporting, and project completion reporting per policy
- Follow all UNS policies and procedures

Requirements:

- 5 years of McAfee support or implementation experience
- Thorough understanding of large scale environments and implementations
- Strong presentation and verbal communication skills
- Excellent, detailed writing skills
- Expert knowledge of using Microsoft Office

Must Have:

- Valid Driver's License
- Valid Passport
- Ability to work greater than 40 hours per week as needed
- Ability to travel at least 65 percent of the time
- Ability to lift up to 50 pounds
- High School Diploma or Equivalent Experience

DESIRED Skills/Experience:

- College degree, A.S. or higher
- Certifications with McAfee
- Strong relationships with security experts within the region
- Knowledge of regulatory compliance: GLBA, SOX, PCI, HIPAA and Assessment Services a plus
- CISSP or other professional certifications
