

The UNS Solution

UNS is all things cyber safety. We help businesses of all sizes assess, implement, and maintain the highest standard in network security. Whether it's a small business in Minnesota, an oil field in Saudi Arabia, or a bank in New Zealand, our global reach and breadth of experience will help keep your business safe from cyber threats.

The UNS Approach

- **Analyze** existing security infrastructure, security practices, and business objectives
- **Develop** a project plan and schedule to meet your security needs
- **Architect** a solution to meet your business and operational requirements
- **Install**, configure, and deploy your security solution
- **Provide** security as a service by managing and monitoring

What does UNS do?

The UNS team of Security Certified Product Specialists assess, develop, and implement solutions that optimize your network security. No matter the size of your business or what level of network security your company has, we will assess and implement the best solution to keep your business cyber safe. If the needs and size of your business require staff augmentation, UNS can help there, too. We offer contract, contract-to-hire, and permanent placement staffing globally. We are dedicated to providing clients with the most experienced and qualified talent to ensure all technology needs are met.
